Objective

My goal is to become associated with a company where I can utilize my skills and gain further experience while enhancing the company's productivity and reputation.

Experience

Gigabyte Solutions
Shop attendant

I used to tend to the day to day activities of the tech store. By doing so, I attained numerous skills; formatting, laptop repairs and my utmost favorite 'programming'. After I gained a threshold of knowledge from my place of work, I decided to better myself in the art of programming.

Paprika
Dispatcher

I also worked with this noble company, where I was in charge of delivering food items to places both in and out of my region. Here I acquired people skills and an understanding of the need for cooperation.

Education

University of Ghana
Mathematics and Computer Science
2022 — **3.7**

Bishop Herman College
General Science
2018 — **13**

Skills

- Programming with Python, and Java

Experience with Version Control

Problem-Solving

Communication

Knowledge on Database Management Systems

Knowledge on the Software Development Lifecycle

Projects

A Car Purchasing Advisor Website
This website was a school project I built. It provides the performance capabilities for different cars as well as their prices.

10965604.netlify.app

WeatherWebScraping
It provides the weather information for Accra city, over a 10-Day period and saves it in a Csv file.

Password Manager
For this project, I built a password Manager, using purely python, by leveraging the Tkinter library and using various encryption techniques to secure the password

https://github.com/rdjirackor/Password_Manager

Password Manager
I built a real world password Manager, using android studio. This password Manager stores passwords and makes them completely inaccessible to unknown persons. It also syncs passwords to the user's Google account

https://github.com/rdjirackor/Password_Manager_Android

Calculator App
This is a simple yet graphically appealing calculator app
